

Learning Outcomes:

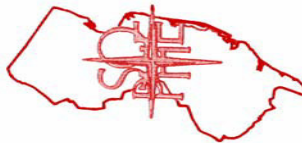

Participants will acquire knowledge about the Mobilization for Action through Planning and Partnerships (MAPP), the nation's premier public health initiative. MAPP is a community-wide strategic planning tool for improving community health. Implementation efforts throughout the United States, New Jersey, in counties and in municipalities resulted in the widespread formation of Community Health Improvement Plans (CHIP). Model CHIP's will be featured at the meeting.

Participants will gain hands-on examples of how to develop task forces, create and sustain coalitions, and help communities address issues of obesity, emergency preparedness, cultural awareness, environmental health, and more.

Participants will become motivated and know how to join and support their local Community Health Improvement Plans' (CHIP's) Task Forces and Working Groups that address public health issues. Health educators possess essential skill sets needed by CHIP's.

Participants will meet new professional colleagues in a unique meeting atmosphere while enjoying delicious, gourmet fare.

NJ SOPHE
